

Are you, or have you ever been a smoker?

Lung cancer kills 1 million people every year. A study in the prestigious *New England Journal of Medicine* has found that a CT scan of your chest can dramatically increase your survival rate if you have lung cancer and it is detected early.*

**Black Hills Surgery Center is offering CT chest scans for \$250 to screen for lung cancer.
Your scan will be read by a fellowship trained board certified radiologist.**

Doctor referral is not needed.

Call today to schedule your screening, Telephone 605.721.4800 or Toll Free 888.826.3949.

The choice that makes a difference.

215 Anamaria Drive, Rapid City Telephone : 605.721.4800

Do Not Delay Getting this Important and Life Saving Test. It Takes Less than an Hour.

* *New England Journal of Medicine*, October 26, 2006. Positive findings may require further follow-up treatment with your individual health care provider.
