Black Hills Surgery Center Earns ACR Accreditation

Black Hills Surgery Center has been awarded a three-year term of accreditation in magnetic resonance imaging (MRI) as the result of a recent survey by the American College of Radiology (ACR).

“We proceeded with this survey as it is our paramount goal to provide the most efficient service, quality care and accurate imaging in the region, and this accreditation is a validation to our commitment,” explains Nick Wilson, Black Hills Surgery Center Imaging Manager. “Our team worked very hard to complete this survey, and I am so proud we’re the first imaging center in the region, and one of four in South Dakota, to receive this accreditation.”

The ACR, headquartered in Reston, VA, awards accreditation to facilities for the achievement of high practice standards after a peer-review evaluation of its practice. Evaluations are conducted by board-certified physicians and medical physicists who are experts in the field. They assess image quality, personnel qualifications, adequacy of facility equipment, quality control procedures and quality assurance programs. The surveyors report their findings to the ACR’s Committee on Accreditation, which subsequently provides the practice with a comprehensive report.

About American College of Radiology

The ACR is a national organization serving more than 32,000 diagnostic/interventional radiologists, radiation oncologists, nuclear medicine physicians, and medical physicists with programs for focusing on the practice of medical imaging and radiation oncology as well as the delivery of comprehensive health care services.

About Black Hills Surgery Center

Black Hills Surgery Center, LLC is South Dakota's premier surgical and imaging center offering in-house hospitalists, high nurse to patient ratio, private suites, luxury accommodations, first class hospitality team and state-of-the-art technology including 3T MRI and 64-Slice CT scanners. BHSC employs over 200 employees and works with a team of fellowship trained, board-certified radiologists. Surgeries conducted at Black Hills Surgery Center include orthopedic surgery, neurosurgery, general surgery, gynecology, podiatry, urology, dermatology, ophthalmology, plastic and reconstructive surgery, and dental/oral surgery. By specializing in specific surgeries, Black Hills Surgery Center allows our team to do and be the best in their field.
